## TECHNICAL SKILLS

**Languages:** Java, Python, C/C++, HTML/CSS, Javascript, SQL, Assembly
**Developer Tools:** Git, Docker, VS Code, Visual Studio, Unreal Engine, Netbeans
**Operating Systems:** Windows, Linux
**Project Development:** Independent and collaborative experience, proficient in Waterfall and Agile methodologies

## EXPERIENCE

**Software Developer** — July 2023 - Present
*Subcontractor* — *Guelph, ON*

- Developed a mobile app using C++ in Unreal Engine independently, while adhering to client's design specifications
- Designed modular project structure allowing seamless integration of new features based on ongoing client feedback
- Maintained proactive communication with client to deliver project components and actively engaged in discussions to identify and implement improvements

**Store Clerk** — August 2020 - Present
*Zehrs Hartsland* — *Guelph, ON*

- Used problem solving and proficient communication skills while managing inventory software to ensure optimal product availability and exceed client satisfaction targets
- Demonstrated leadership by effectively managing junior employees, fostering a collaborative team environment, and implementing strategies that improved efficiency and customer service

**Lead Website Developer** — January 2022 - June 2022
*Beyond Borders* — *Guelph, ON*

- Collaborated with a team of 35 students to plan, organize, and execute a charity event called Envision
- Lead the design and development of a website for the Beyond Borders Envision charity event
- Envision raised approximately $44,000 for charity, and I received an award for dependability

## PROJECTS

**Personal Portfolio Website** | *HTML, CSS, Javascript, Netbeans, Git* — June 2023 - Present

- Developed a website using HTML, CSS, and Javascript within Netbeans IDE to showcase my coding projects
- Implemented version control with Git to facilitate efficient project management

**Pokemon Game** | *Java, VS Code, Netbeans* — January 2022

- Collaborated with a team of three to develop an OO program that met specific design requirements using Java
- Assumed a leadership role within the team, fostering open communication and ensuring effective collaboration to maximize productivity and project success
- Employed Junit test cases to rigorously test and debug the project within tight time constraints

## EDUCATION

**University of Guelph** — September 2022 - Present
*Honors Bachelor of Computing, Computer Science, Minor in Biology* — *Guelph, ON*
